

AUGUSTIN CHAN

AI CONTENT SYSTEMS | CREATIVE TECHNOLOGY

Hong Kong | +852 6385 7807 | aug@digitalrain.studio | LinkedIn | GitHub | augustinchan.dev

PROFESSIONAL SUMMARY

Creative technologist with 20+ years bridging complex technical systems and business outcomes. Built and shipped **ContentMind**, a production AI content engine generating multi-format content (social, research, intelligence briefings) with autonomous publishing, prompt optimization frameworks, and brand-safe quality controls. Extensive senior client advisory experience across Asia-Pacific and EMEA, translating technical capability into clear business value for enterprise stakeholders. Combines hands-on coding (Python, TypeScript, APIs) with strategic communication skills honed through years of pre-sales, consulting, and technical leadership.

CORE COMPETENCIES

AI Content Systems	Multi-Format Content Generation (Social/Research/Intelligence), DSPy Prompt Optimization, Claude/GPT API Integration, Writing Style Governance, Anti-AI Detection Guidelines, Autonomous Publishing Pipelines
Creative Technology	Prompt Engineering & Frameworks, Multi-Agent Orchestration, RAG Systems, Content Personalization, Real-Time Analytics Dashboards, A/B Testing for AI Outputs
Automation & Tools	Python, TypeScript/JavaScript, FastAPI, REST APIs, No-Code Integration, WebSocket Real-Time Systems, PostgreSQL, Vector Search (pgvector)
Platforms	Next.js, React, Vercel, Supabase, fal.ai (Image/Video), OpenRouter, Docker, Git
Client Advisory	Enterprise Consulting, Pre-Sales Engineering, Technical Presentations, Stakeholder Management, Requirements Translation, Solution Architecture

PROFESSIONAL EXPERIENCE

CTO & Founder, Digital Rain Studios digitalrain.studio	Nov 2023 - Present
<i>Hong Kong</i>	
Building AI-powered content systems and creative technology products. Focus on production-ready solutions that scale.	

ContentMind / QDayAnon — Production AI Content Engine (2024-2025) | qdayanon.com

End-to-end content intelligence platform: source ingestion → AI generation → autonomous publishing

- **Multi-Format Content Generation:** Built system producing 5 distinct content types (viral social, research summaries, intelligence briefings, historical insights, threat assessments) with format-specific optimization for each platform
- **Prompt Framework Architecture:** DSPy-based signature system with 20+ specialized generators, structured outputs, and complete audit trails for explainable AI decisions
- **Writing Quality Governance:** Implemented anti-AI detection guidelines, forbidden pattern detection (AI tells, corporate speak), and format-specific style enforcement for brand-safe outputs
- **Autonomous Publishing System:** Intelligent scheduling with tactical diversity scoring, source rotation, format variety enforcement, and multi-account management
- **Multi-Model Orchestration:** Dynamic model switching across 10+ LLM providers (Claude, GPT, DeepSeek, Gemini) without code changes; live capability optimization and cost tracking
- **Real-Time Analytics:** WebSocket-powered dashboard for content performance, LLM usage metrics, and operational monitoring
- **Research Automation:** Multi-source aggregation (Google RSS, arXiv, Semantic Scholar), AI-driven relevance filtering, automated citation management

8-Bit Oracle — AI Creative Product | 8bitoracle.ai

- End-to-end product: Next.js, Claude API with sophisticated prompt engineering, streaming responses, multilingual support
- Demonstrates full creative technology stack from concept through production deployment

Recognition

- **Consensus HK Hackathon Winner** (Feb 2025) — [Featured by CoinDesk](#)
- Speaker: Taipei Blockchain Week, WOW Summit HK, AI+Power HK Demo Day
- Technical interviews and panel discussions on AI implementation

Development Architect & Senior Consultant, Informatica

Aug 2011 - Nov 2023

Hong Kong (serving Asia-Pacific, EMEA, Global)

Senior Client Advisory & Architecture (Jun 2015 - Nov 2023)

- **Global Stakeholder Engagement:** Provided architectural guidance, design reviews, and strategic technical advisory to top-tier enterprise customers across banking, insurance, airlines, and government sectors
- **Technical Translation:** Consistently translated complex system capabilities into clear client value propositions for senior business and technical stakeholders
- **Systems at Scale:** Architected performance improvements achieving 200% efficiency gains through distributed systems design and optimization

- **Cross-Regional Leadership:** Supported accounts across Asia-Pacific, EMEA, and North America; comfortable operating in diverse cultural and organizational contexts

Senior Consultant & Technical Delivery (Aug 2011 - Jun 2015)

- Led first enterprise implementation in Asia-Pacific region (2011); established delivery patterns for subsequent regional deployments
- End-to-end project delivery for major airline, insurance company, and quasi-governmental agency
- Requirements gathering, solution design, and hands-on technical implementation

Sr. Pre-Sales Engineer & Consultant, Dun & Bradstreet / Purisma

Jul 2006 - Aug 2011

Hong Kong & San Francisco Bay Area

- **Pre-Sales Technical Leadership:** Led technical sales process for enterprise software; presented to C-level and senior stakeholders; contributed to successful acquisition by D&B
- **Client Advisory:** Remote and on-site consulting for hosted enterprise customers; expert troubleshooting and solution design
- **Demystifying Technology:** Translated complex technical capabilities for non-technical audiences; built trust through clear communication

Prior Experience

1996 - 2006

Technical consulting, pre-sales engineering, and technical support roles at Blackstone Technology Group, Vitria Technology, Sybase, and Prolifics/JYACC. Foundation in enterprise systems, client engagement, and technical communication.

EDUCATION

B.S. Cognitive Science with Specialization in Computation

1996

University of California, San Diego (UCSD)
